THE VERDICT

Elite location and schools, but the leveraged investment math is challenging — best for an owner-occupant or all-cash buyer.

01 EXECUTIVE SUMMARY

INVESTMENT SIGNAL	COMPOSITE SCORE	SUGGESTED OFFER
HOLD / WATCH	59/100 (B)	Owner-occupant: \$800K–\$850K. Investor: walk away unless ≤\$620K cash.

Analyst Summary

Mixed signals. The home, neighborhood, and macro market are strong; the deal math is brutal as a leveraged investment because of NJ property taxes (\$21,915/yr). Best fit is an owner-occupant family who values the #16-NJ school district and plans 7+ year hold, OR an all-cash buyer. Investors at retail entry will bleed \$30-45K/yr. Flippers need ≤\$580K basis for the math to work. Last sale of \$779,900 represents a ~10% discount to FMV mid (\$870K), attributable to original 1981 condition needing \$75-125K refresh.

Key Strengths

- Elite schools: Moorestown Twp — Niche A+, #16 NJ.
- Very safe: 56% below national average.
- Priced below comp average (\$858,200 avg) — entry discount to fair market value.
- Affluent, supply-constrained area (median HHI \$158,770).
- Durable employer base: Lockheed Martin, Subaru of America HQ, BMS, J&J, Cooper Health.

Key Risks

- NJ Property Tax: 2.81% effective, escalated from 2.76% YoY. \$22K today, \$26K+ in 5yr. Reassessment risk.
- Condition / CapEx: 1981 build at 45-yr CapEx wall; \$75-125K refresh likely needed
- SALT Cap Cliff (2030): SALT reverts to \$10K in 2030 → 3-7% NJ home price repricing risk
- Interest Rate Risk: Investor rates currently 7.5-8.0%, not 7%. Rate drops boost; hikes hurt
- Liquidity / Exit Tax: NJ exit withholding 8.97% of gain or 2% of sale price; 38-55 day DOM. Plan 7+ yr hold.

02 COMPOSITE SCORE BREAKDOWN

The composite score is the weighted sum of five independently scored categories (each 0–100). Weights are fixed across every property so scores are comparable.

06 METHODOLOGY

Five specialist analytical passes — comparable sales, rental cash flow, neighborhood, investment strategy, and local market — each score the property 0–100 from public records and recent sales. Scores are combined on a fixed weighting (comparables 25%; income, neighborhood, and upside 20% each; market conditions 15%) to produce the composite Property Score. Conservative assumptions are applied throughout, and every input is traceable to a named public source.

Analytical Pass	What it does
Comparable Sales	Recent nearby transactions establish a price-per-square-foot band; the subject is valued and condition-adjusted against it.
Rental Cash Flow	Market rents minus vacancy, debt service, taxes, insurance, maintenance, management, and reserves yield net cash flow and yield metrics.
Neighborhood	Schools, safety, income, walkability, and growth are scored from public ratings and census data.
Investment Strategy	Buy-and-hold, BRRRR, and fix-and-flip feasibility are stress-tested against the deal math.
Local Market	Price momentum, inventory, days-on-market, rates, and economic anchors classify the market and set the appreciation outlook.

Recommended Due-Diligence Actions

1	Pull MLS NJBL398454 directly to verify condition, lot size, garage, basement, recent updates
2	Burlington County parcel pull — verify current assessed value & post-reassessment tax bill
3	Reserve \$75-125K for 1981 mechanicals (roof, HVAC, windows, kitchen, baths likely all due)
4	FEMA flood-zone determination — Pennsauken Creek tributaries nearby
5	If owner-occupant: offer \$800-850K contingent on inspection. If investor: pass.
6	Consult NJ tax attorney on SALT cap 2030 cliff and exit-tax implications
